## Installation characteristics

Electrical connection by 5-pole + T connector for cable up to 2.5 mm2. The maintained luminaires have the possibility of connection to enable / disable the maintained mode. Possibility of installation in: Ceiling/Wall surface with clamping flanges. Suspended roof, with eyebolt. Possibility of connection with: Surface tube wiring. Two 3/4" NPT entries for cable glands (not included), one of which is provided with a plug.

#### **Operating characteristics**

The luminaire has status LEDs, which indicates:
Status of the battery charging circuit.
Battery status (duration)
Emergency status function.
Test status.
Microprocessor controlled luminaire that performs periodic and automatic tests.
Functional test every 7 days.
Duration test every 365 days.
The test result is shown in the status indicator LEDs.

Remote control input that allows:

Put on Standby without power supply. Restart in emergency status without power supply. Switch on in emergency status (more than 24 h of charge) Manual and remote duration test. (more than 24 hours of charge). Date and time programming of the tests. Reset of the luminaire status.

# General Envelope data

Tubular diffuser: Borosilicate glass, E1 (7mm thick) E2/E3 (9mm thick) Polycarbonate, UV protected. 3mm thick.

Casting & connections: Aluminum injection Manufactured from marine grade aluminum alloy copper free Yellow RAL-1003 polyurethane paint Explosion proof O-ring. 2 entries 3/4" NPT for cable glands (not included) 1 plug supplied Electric connection through 5P+T 2,5 mm2 terminal block Suitable for installation on flammable surfaces
